COOLING WATER TREATMENT

AQUA-KEM 211c

Scale and corrosion inhibitor, high dispersant

GENERAL DESCRIPTION

AQUA-KEM-211c is an absolute corrosion and scale inhibitor for use in open recirculation cooling water system. The product protects both ferrous and nonferrous metals against corrosion and controls scale, rust, sludge and fouling due to suspended solids. This special formulation contains no chromate, zinc or toxic additives to cause pollution.

AQUA-KEM-211c will not recover age the development of resistant strains of bacteria, and therefore can be regularly applied.

It is extremely effective for online cleaning and thus requires a low foaming surfactant.

PRODUCT DATA

Appearance	-----	Brown liquid
Specific gravity	-----	1.1
pH	-----	Less than 4

APPLICATION

AQUA-KEM-211c is corrosive to most metals and therefore stainless steel or acid resistant engineering plastics should be used dosing pumps.

The exact dosage of AQUA-KEM 211c will be advice by our water treatment representative for is application.

SAFETY PRECAUTIONS

Gloves and goggles must be worn when handling the concentrated solution. Avoid contact with eyes, skin and clothing. Splashes and spills should be washed away immediately using large quantities of cold water.

PACKAGING & STORAGE

AQUA-KEM-211c is available in 25 kg Drum

Store in a dry place, keep lid & container when not in use to prevent the possibility of spillage and dilution
